

LASITHA E

Product Manager · Ex-SDE & Project Manager · Consumer & Growth

🏠 lassitha.me 📞 +91 9048480669 ✉ lasithaeaswaran@gmail.com 🌐 [lasithae](#) 🗣 [LasithaE](#)

Profile

Product Manager with a background in technology and product development. 4+ years of experience working in early-stage startups and fast-paced environments - close to founders, first iterations, data-informed roadmaps, and rapid execution.

Skills

Product: Roadmapping, PRDs, Wireframing, User Research, Metrics (NSM/OKRs), Experimentation, Instrumentation, Go-to-Market, A/B Testing, Stakeholder Management

Technical: React, Kotlin, Python, Django, GraphQL, SQL, PostgreSQL, Next.js, LLM/RAG Prototyping

Tools: Jira, Notion, Figma, Amplitude, Mixpanel, Tableau, CleverTap, REST APIs, Postman

Projects

Goal-Based SIP Retention Tracker: SEBI-compliant concept that re-anchors users to their original investment goal to reduce SIP drop-off.

Inbox Swipe: Swipe-based triage UI that lets users clear and organise their Gmail inbox in minutes.

Order Support Voice Agent: Real-time voice agent bound to a specific order, supports Hindi, Kannada, and Tamil, can process a return or refund.

Voice Benchmark: Internal eval tool comparing Sarvam and Gnani across Hindi, Kannada, and Tamil on latency and pitch variation.

Experience

HomeRun

Jan 2026 – Jun 2026

Associate Product Manager

Bengaluru, India

- **In-App Marketing & Instrumentation:** Initiated event tracking infrastructure from the ground up and scaled in-app marketing; drove a **60% increase in new user acquisition** within 45 days.
- **AI-Powered Tooling:** Automated cross-system price updates, a WhatsApp automation for split-fulfilment order tracking (**cut CX queries by 68%**), and built performance dashboards for AOV, cohort, and lifecycle insights.
- **Bulk Pricing:** Launched HomeRun's first tiered pricing system across 23 SKUs and owned GTM across WhatsApp, Instagram, and email, driving a **6.8% increase in average order quantity**.
- **Address Book:** Identified the gap in single last-used-address logic and drove introduction of address book; reduced **address-related CX queries by 15%** and improved **repeat order retention by 10%** among B2B users ordering for multiple locations.
- **Search Optimisation:** Initiated and led evaluation of 8-9 third party search vendors; analysed capabilities, negotiated and finalised the right solution for the current stage; released v0 in 2 weeks, improving **search conversion by 16%**.
- **Platform Stability:** Prioritised the roadmap using data analysis and led resolution of **18 business-critical bugs** across app and web with three dev teams, clearing the backlog in 1 month and lifting **checkout conversion by 10%**.

Inheaden

Aug 2023 – Dec 2025

Project Manager & Frontend Developer

Bengaluru, India

- Led the team to build a Shopify-Airtable booking and ticketing system for an events and family entertainment platform, processing **1,000 tickets/day (30K/month)**; owned full scoping, stakeholder alignment, and delivery end-to-end, shipping in 6 months.
- Built an internal knowledge management platform for a government client, indexing **200K documents** into a multimedia knowledge base queryable through an AI chat interface.

Lummo

Aug 2022 – Mar 2023

Software Development Engineer - L1

Remote

- Built Instagram and Shopee order-channel integrations for LummoChat; merchants using these channels saw a **35% increase in total orders** compared to pre-LummoChat baseline.
- Built a rich text editor for the chat experience, contributing to an **18% increase in customer response rates**.
- Introduced ReCAPTCHA before WhatsApp redirect during onboarding, blocking bot-driven message costs and cutting spam interactions by **63%**.
